

Leaping Lizards

Fun Facts:

- Lizards are reptiles.
- Lizards are cold blooded. This means their body is the same temperature as the environment around them!
- Lizards lay eggs that are soft.
- Lizards have scaly, dry skin.
- There are almost 6,000 kinds of lizards!
- Lizards have different physical characteristics that make them unique!

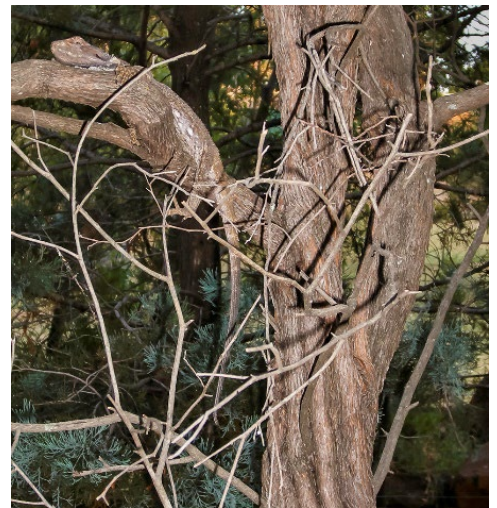

Activities:

Draw a Dragon:

- Draw a picture of a lizard, the habitat it lives in, and color your picture so that the bearded dragon is camouflaged. (Camouflage is when animals blend in with their surroundings).
- Write or dictate a sentence describing your lizard.

Can You See Me?

- Take a walk outside and see if you can find any plants or animals.
- Describe what each plant or animal looks like to a friend.
 - Color
 - Size
 - Shape
 - Texture

How Tall Are You?

- Find a string and have an adult cut it to the length of your arm. This is about the length of a bearded dragon!
- Use the string to measure various objects to see if they are longer or shorter than the string.
- Find 3 things that are shorter and 3 that are longer.

Same and Different Cards

Cut out cards. Have students discuss the things that are the same and different about the items paired on each card.
