

Iggy the Red Iguana

Fun Facts:

- Red Iguanas are large reptiles that grow to be more than six feet long.
- Red Iguanas have a red body and a bright green belly.
- Iguanas have bumpy skin and spikes running down their backs.
- Red Iguanas live in the southern and eastern parts of Africa.
- Iguanas, like other lizards, are cold blooded. They use the sun, water and other things in their environment to help them stay warm and cool off.
- Iguanas can live for more than 20 years.
- Red Iguanas are herbivores, which means they eat plants such as spinach, greens, broccoli carrots and even strawberries.

Activities:

Draw an Iguana:

- Draw a picture of Iggy the red iguana.
- Write a sentence describing how he looks.
- Are there any other animals that he reminds you of?

Go on a Food Hunt:

- Look in your kitchen. Can you find food that you think iguanas can eat?
- Fold a piece of paper in half and label. Draw pictures of the food you found sorting them by fruits and vegetables.
- Can you think of any other ways to sort the food you found? (Smell, size, touch, color)

🍓 Fruits 🍎	🥬 Vegetables 🥕

Write a Story:

- Write or tell a story about an iguana.
- What does the iguana do all day? Tell what happens first, next and last.
- Don't forget to illustrate your story!
