

# Meet Iggy the Red Iguana

## Fun Facts:

- Red Iguanas are large reptiles that grow to be up to 6 feet long.
- Red Iguanas have a red body and a bright green belly.
- Iguanas have bumpy skin and spikes running down their backs.
- Red Iguanas live in the southern and eastern parts of Africa.
- Iguanas, like other lizards, are cold blooded. They use the sun, water and other things in their environment to help them stay warm and cool off.
- Iguanas can live for more than 20 years.
- Red Iguanas are herbivores, which means they eat plants such as spinach, greens, broccoli carrots and even strawberries.

## Activities:

### Draw an Iguana:

- Draw a picture of Iggy the red iguana.
- Write a sentence or words that describe how you know if an iguana is living or nonliving.

 Living 	 Nonliving 

### Go on a On a Living/ Nonliving Hunt:

- Look around your home, both inside and outside. Look for things that are living and nonliving.
- Fold a piece of paper in half and label it. See the example.
- Draw pictures of what you find on your hunt in the correct column.

### Build a Story:

- Cut apart the following pages and put them in order. Glue or staple the edge to make a book.
- Cut apart the cards as use them to complete the sentences and then illustrate each page.
- Find a friend to read your creation to!
